ID	Name	Type	Label	missings	Values	Value Labels	Freq.	%
1	answer_id	integer	Unique answer ID	0 (0.00%)	range: 115-1047346			
2	answer_body	character	Answer provided to question	0 (0.00%)	- Get into a routine and spend time revisiting your goal every week/month. Consistency is key. People learn and grow at a different rate. - Break down your big goal into smaller and manageable steps. - Reach out to support systems and ask for help (such as teachers, counselors, mentors, financial aid, and resource groups). Find space you are comfortable with and share your stories and listen to others - 80% of something is better than 100% of nothing. Giving it a try is better than not doing anything at all. - - Good GPA - Volunteer experience - Join groups/clubs in school (be an officer if possible) - Have some medical experience (scribe, PCT, CNA, etc.) Reach out to your local hospital, they almost always have volunteer opportunities and chances to be able to shadow different professions! I chose state university for college and medical school to save money. If you want to pursue a research career in academic medicine you might consider an elite private school like Harvard, Johns Hopkins or Stanford. I work in the social services field which lends itself to psychology. In the 10.02 10.02 10.02 10.02			

beginning of my career
while working in a Drug
& Alcohol outpatient
clinic, what I found
most intriguing
concerning the study of
the mind was dealing
with human nature.
Which in one moment (a
person) can be behaving
wonderfully with you
and in the next doing
some awful act . This
gave me a glimpse into
the magnitude of
studying the mind which
appears to be endless.
So, conversely learning
that people have actually
formed concepts and
ideas about what can be
considered infinite was
fascinating to me.
Currently, I'm fascinated
by personality disorders.
Being able to see the
manifestation of a
diagnosis walking
around in real time as
you become aware of
dysfunctional behaviors
that are presenting
themselves. Basically it
seems like being able to
make sense of
something that almost
seems to be invisible.
What you will
experience are behaviors
which don't seem to be
quite right. Then with
your knowledge in
psychology you can
possibly begin to see the
manifestation of a
diagnosis. This will be
especially helpful when
you get people coming
to you as a professional
saying, "I'm constantly
doing the same thing
over and over and it gets
me into trouble but I
don't understand why"
or you will encounter,
say, a child who is angry
a lot but doesn't know
why. In your work when
you begin to provide

help and relief to minds that are confused, in anguish, etc. it will hopefully afford you a sense of pride, accomplishment, and satisfaction that you will be truly making a difference in your efforts to make this a better world to live in.
